

AIM Intumescent Movement Joint

Intumescent Joint Filler for locating within linear gaps in walls

A versatile, compressible intumescent sealing strip for joints in compartment walls and floors. The AIM intumescent expansion joint is a high quality composite sandwich of fire retardant foam and intumescent seals. This product is held in place by compression, without the need for mastics or adhesives.

Specifications.

- Supplied in 1000 mm lengths
- Up to 4 hour fire rating
- Tested to BS476 part 20
- Vermin, rot proof & maintenance free
- Moisture resistant

Applications

- Suitable for gaps ranging between 8mm & 100mm
- Expansion joints in masonry walls
- Top of masonry wall under soffit
- Suitable for most types of building movement joints

Installation

The AIM intumescent expansion joint is easily installed without the need for any specialist equipment. It is simply push fitted into position ensuring that a tight fit is achieved. Care should also be taken to ensure that any butt joints are also a tight fit.
